TROUBLESHOOTING
- Côr Smart Home app reads “The camera is offline” or “The device is not registered” when camera is added.
- Make sure your router is connected to the Internet and you have a good Wi-Fi® signal.
- The mobile device cannot receive notification prompts when the camera is online.
- Make sure the Côr Smart Home app is running on your mobile device. Motion Detection is enabled and Notifications are turned on. Android users should make sure the app is running in the background.
- iOS users should enable the message push function in “Settings > Notifications.”
- If alarm prompts still fail to appear, hold down the RESET button for 10 seconds to restore the camera settings to factory default. (Note: you will need to set up Wi-Fi® again.)
- Live view or playback failed.
- Make sure your network is well-connected. You can refresh the video or change network and try again.
- How to connect to a new Wi-Fi® network.
- Hold down the RESET button on the camera for 10 seconds to reset and restart the camera.
- Reconnect the Wi-Fi® by following the in-app steps.

INSTALLING THE CAMERA

1. Make sure the wall is strong enough to withstand three times the weight of the camera and the mounting.
2. If the wall is cement, you must insert expansion screws before you install the camera.
3. If the wall is wooden, you can use self-tapping screws to secure the camera.
4. The camera can be installed on the wall or ceiling.
5. The instructions below are for wall mounting.
6. Mounting template
   a. Stick the mounting template where you plan to install the camera.
   b. Drill the holes according to the mounting template.

7. Installing the camera
   a. Route the camera cables through the mounting base and wire the cables through the side opening.
   b. Align the mounting base to the wall and screw the supplied screws.
