SAFETY CONSIDERATIONS

Installing, starting up, and servicing air−conditioning equipment can be hazardous due to system pressures, electrical components, and equipment location (roofs, elevated structures, etc.).

Only trained, qualified installers and service mechanics should install, start−up, and service this equipment.

Untrained personnel can perform basic maintenance functions such as cleaning coils. All other operations should be performed by trained service personnel.

When working on the equipment, observe precautions in the literature and on tags, stickers, and labels attached to the equipment.

Follow all safety codes. Wear safety glasses and work gloves. Keep quenching cloth and fire extinguisher nearby when brazing. Use care in handling, rigging, and setting bulky equipment.

Read these instructions thoroughly and follow all warnings or cautions included in literature and attached to the unit. Consult local building codes and National Electrical Code (NEC) for special requirements. Recognize safety information.

This is the safety−alert symbol △. When you see this symbol on the unit and in instructions or manuals, be alert to the potential for personal injury. Understand these signal words: DANGER, WARNING, and CAUTION. These words are used with the safety−alert symbol. DANGER identifies the most serious hazards which will result in severe personal injury or death. WARNING signifies hazards which could result in personal injury or death. CAUTION is used to identify unsafe practices which may result in minor personal injury or product and property damage. NOTE is used to highlight suggestions which will result in enhanced installation, reliability, or operation.
**WARNING**

**ELECTRICAL SHOCK HAZARD**

Failure to follow this warning could result in personal injury or death.

Before installing, modifying, or servicing system, main electrical disconnect switch must be in the OFF position. There may be more than 1 disconnect switch. Lock out and tag switch with a suitable warning label.

**WARNING**

**EXPLOSION HAZARD**

Failure to follow this warning could result in death, serious personal injury, and/or property damage.

**CAUTION**

**EQUIPMENT DAMAGE HAZARD**

Failure to follow this caution may result in equipment damage or improper operation.
OVERVIEW
The Wi-Fi Interface kit and downloadable APP are used to allow a mobile device to become the controller for a ductless system.

WIRING SPECIFICATIONS
All wiring required to install and commission the Wi-Fi kits are provided with the kit or are already present inside the fan coils. Table 1 outlines each kit and their special setup requirements.

N/R – Not Required

*Wire lengths and connector colors may vary from kit to kit.
KSAIF0501AAA and KSAIF0601AAA – High Wall High Tier and High Wall Mid Tier Kits

**Kit Description**

As shown in Table 1, this kit only requires a Wi-Fi dongle for Wi-Fi compatibility.

**Installation Process**

1. Remove power from the high wall.
2. Remove the high wall cover from the unit.
3. Remove the display board cover from the high wall cover.
4. Remove the factory supplied dongle from the black female USB port (where applicable).
5. Install the Wi–Fi dongle into the black female USB port (see Figure 1).

6. Once the dongle is installed, reassemble the display board and high wall covers removed in steps 1 and 2.
7. Turn on the power to the high wall.
8. Complete the app setup instructions found in the Owner’s Manual.

**IMPORTANT:** The Wi–Fi kit and the wired 7 day programmable controller can be installed at the same time.
